Did you know that we spend one third of our lives at work? Wow, that's quite a lot, isn't it? Employees should therefore spend this substantial portion of their lives in an environment that is inspirational and adaptable to their everyday needs. And maybe not just the work-related needs. Just imagine a day with no afternoon coffee break with your colleagues chatting about the weekend.

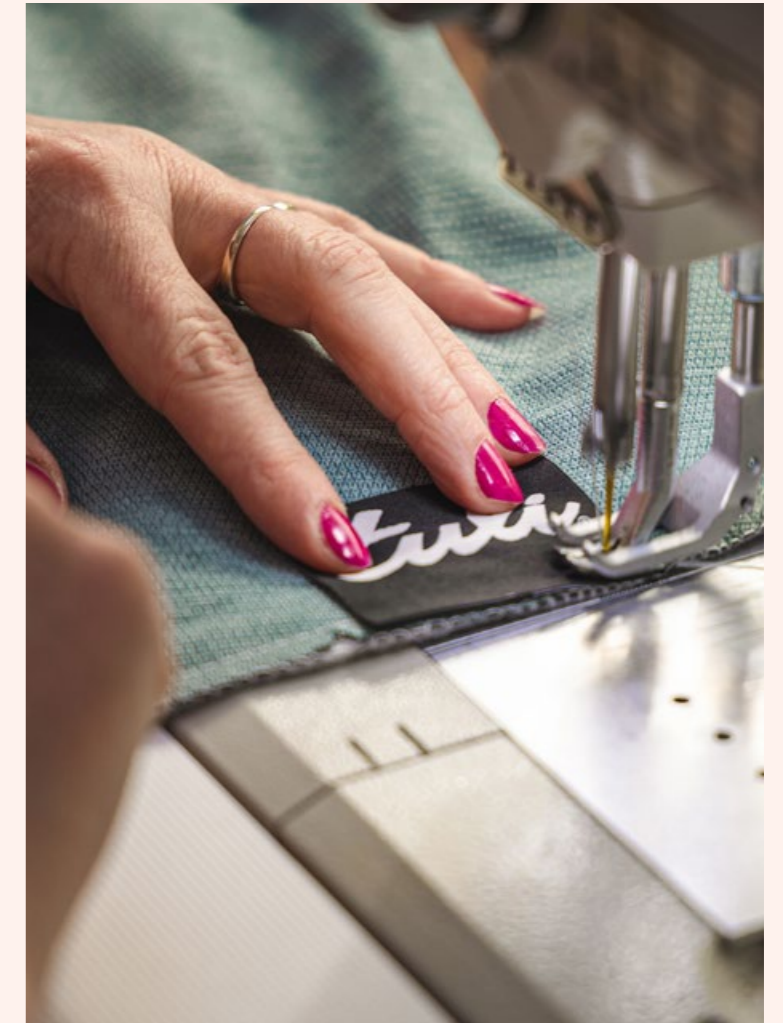

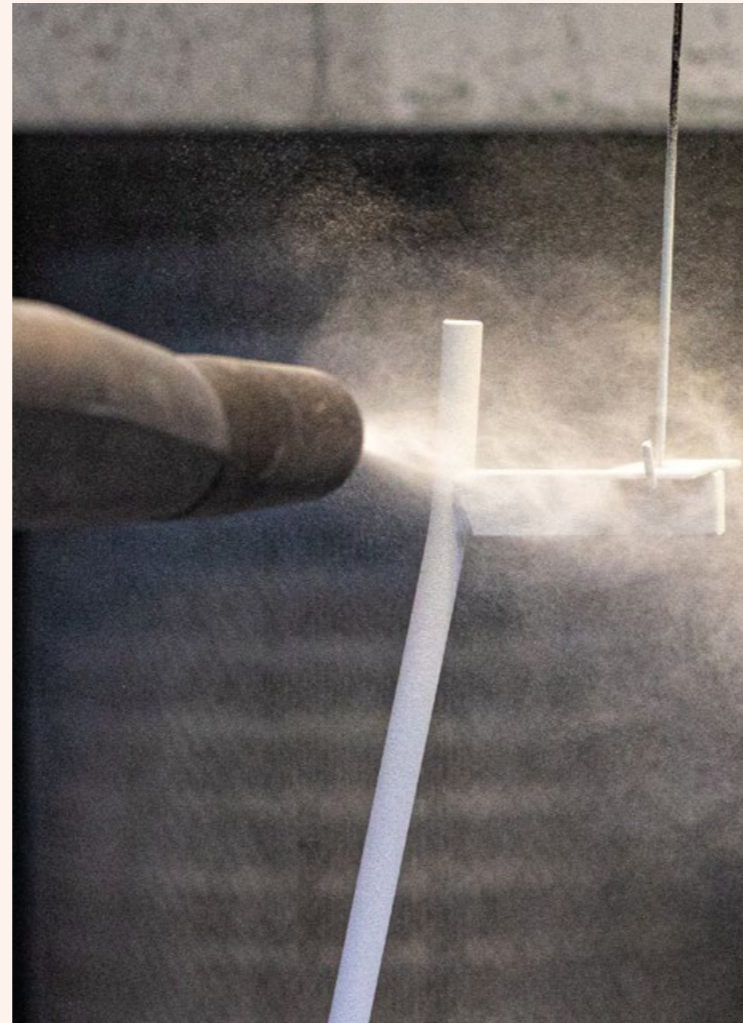

And this is why we design all our products with an important mission in mind. We expect them to help employees stay focused or hold important meetings, as well as do everything else that makes their work days awesome.

Every single Tuli product will thus help you create spaces offering shelter for a nice small talk, celebrate success at work, or even hold spontaneous evening team-building events.

Do you like to move it, move it? Take it easy! Move, swap and combine our furniture as you wish. And all you need is only one arm, because our products are made of materials that are light as a feather.

Our handy furniture is — hand made!

1

When it comes to comfort, we are perfectionists. We manufacture products that you may enjoy for many years, not just days, and we also apply this approach to metal parts, such as bases or armrests.

2

Not only do the thin metal parts perfectly complement our products, but they also are very practical. They are easy to grab, making any rearrangement of our furniture a piece of cake. Powder coated (komaxit) finish is ecological and highly resistant.

3

At the production of the core our products already follow their real contours. Once the cores are ready, the soft foam components are attached to them.

4

The furniture is then upholstered with fabrics tailored to each product. They are suitable for heavy-duty environments, with water-repellent finish, they passed the cigarette test and also meet the REACH requirements for fabrics with hazardous ingredients. You may learn more in the Materials section.

Working hard?

Hardly working?

It does not matter. Our sofas got your backs!

Work & Chill Champion

3 Nimble Sofa 200

2 Nimble Sofa 160

1 Nimble Sofa 80

Nimble sofas combine the best of two worlds – zones created with this collection can be placed in a working environment as well as a cosy office, café or game room. And the best is that you will only need one arm to move them around.

The low weight compared to the Nimble sofa sizes is one of the greatest advantages. What is more, every single unit is equipped with practical loops that make any rearrangement even easier. This is why our sofas are so appreciated by even smaller companies that do not have enough room to house a dedicated meeting room, café and an auditorium. They can rearrange and combine our furniture and change the space design as they wish.

In addition, sofas provide comfort similar to that you may experience with our popular bean bags. But Nimble's unique and elegant design will attract attention anywhere.

Design / Michal Riabič

Lunch break hero

Trace TwoSeater

The number of employees bringing their home made lunch is still growing, and therefore we decided to do everything to prevent them from shovelling it in their mouth parked in front of their computers. We made a sofa that will make their lunch pleasant.

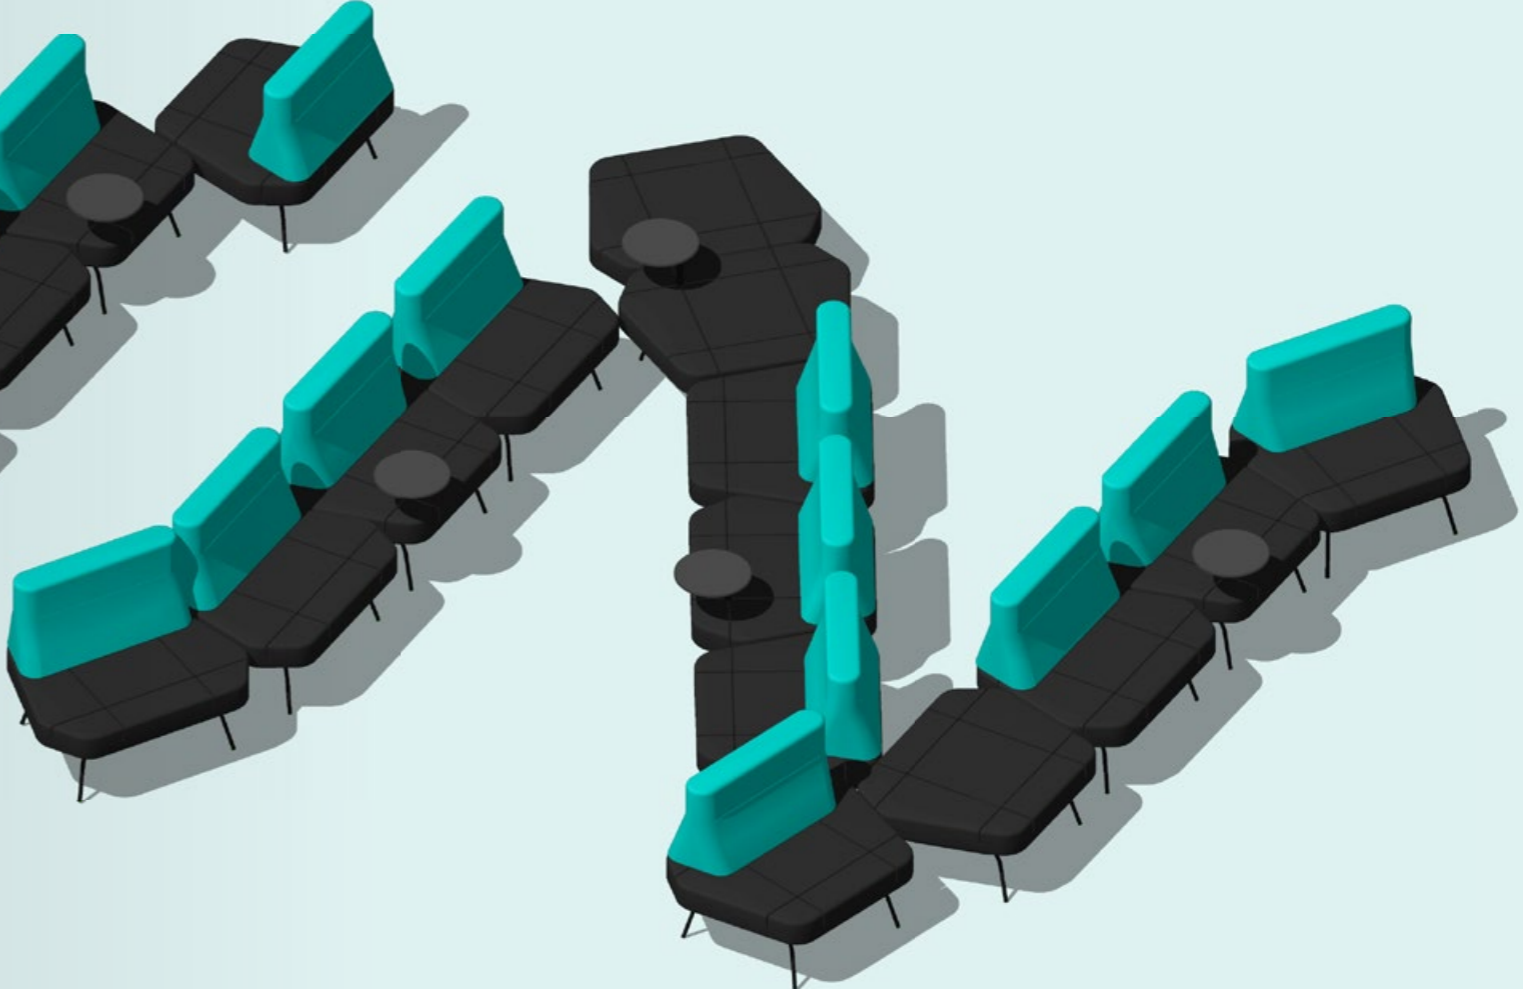

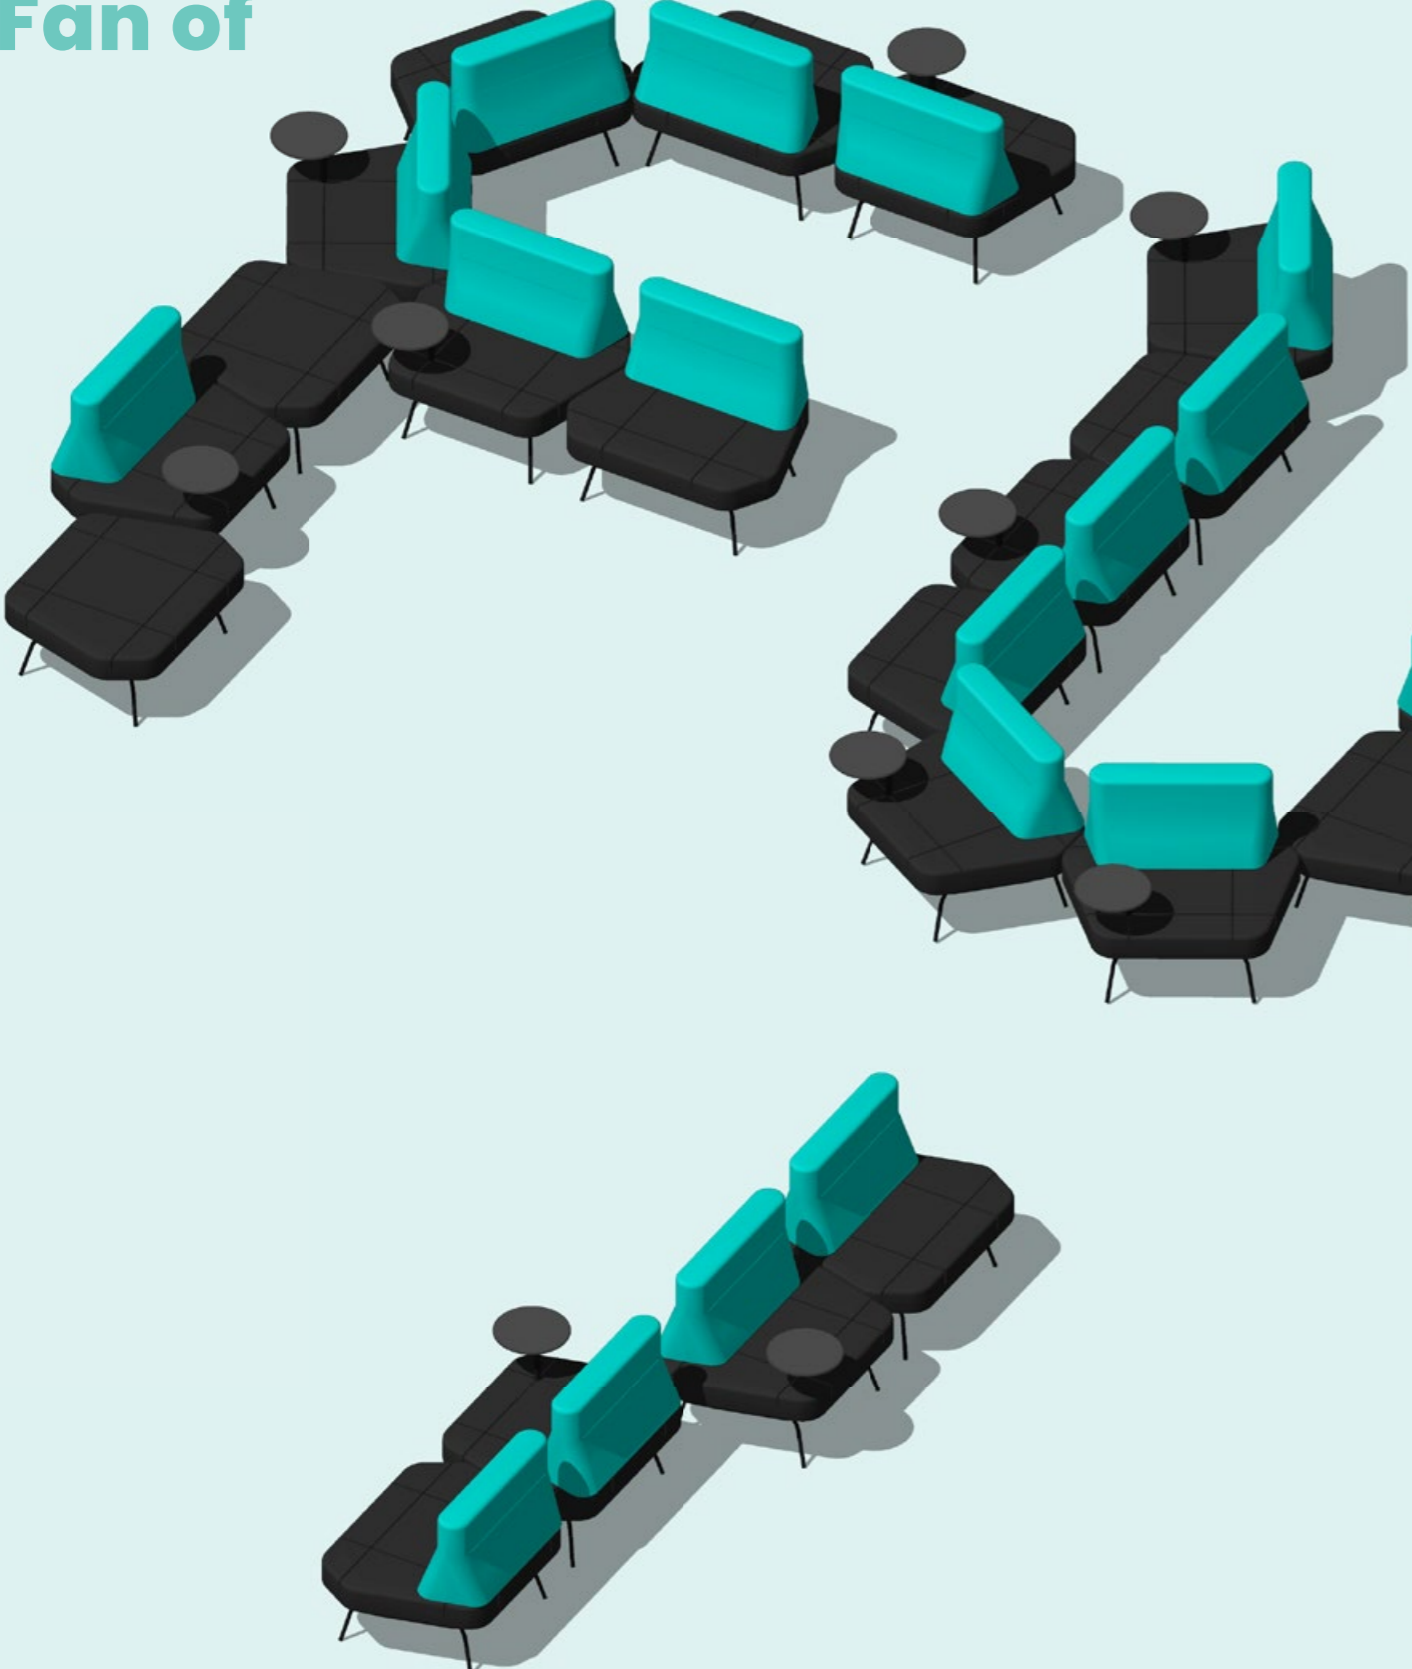

The only thing you need to do is to place our Trace TwoSeater sofas facing each other and you have a great spot for a peaceful American diner-style work lunch.

Design / Michal Riabič

But don't let it fool you. Even though the Trace TwoSeater units can be used to create a great lunch-break zone, this is not the only option. The unusual appearance makes it an attractive piece in any space and an ice-breaker at a meeting with a new client.

Since the back legs do not protrude, the sofas can be easily placed back-to-back or leaned against the wall. You may choose between two options of arms. Whichever you choose, you can never go wrong.

Fan of

Trace Modular

Say good bye to boring-looking spaces. Modular is a hexagon-shaped furniture that can be easily and variously combined and joined into never-ending bench seating. Individuals can change seating as they need – it is really easy to create linear or circular arrangements. This only depends on the edge you decide to join.

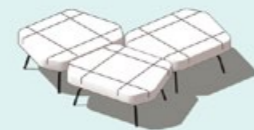

Design / Michal Riabič

Colleagues may sit in a circle or face-to-face; however, Modular looks good even if the individual pieces are arranged in non-linear compositions.

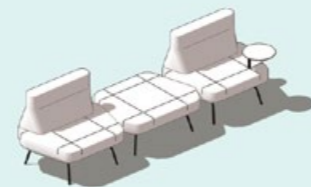

Intelligent, invisible insertion points allow insertion of a backrest in two positions. Generous dimensions offer enough seating area for two persons, or it can be used as a spacious workplace for one person with a notebook.

Circular layout with a small radius

Island

Linear layout

Circular layout with a large radius

Thanks to its unique features and many arrangement options, Modular will easily find its way into various types of spaces, not just offices. It will make shopping centres visitors or travellers waiting at the airport happy.

A modern interior scene featuring a white wall with large, illuminated black letters spelling 'SMALL TALK'. To the left is a planter with green ferns. To the right are two armchairs, one black and one pink. In the top right corner, there are hanging plants and three pendant lights.

SMALL

TALK

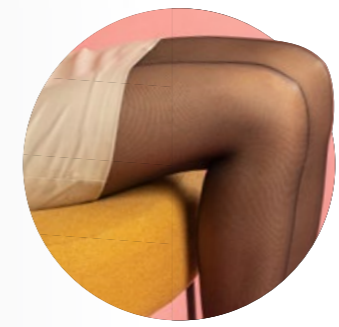

...is as important as a serious business discussion, don't you think?

We understand that sometimes you need to seat the team down for an on-line webinar, and sometimes for a CEO's birthday party. And therefore we thought of both the scenarios when we designed our chairs. The style and material we have used in designing our chairs is suitable for both formal and informal events.

Design / Michal Riabič

Trace

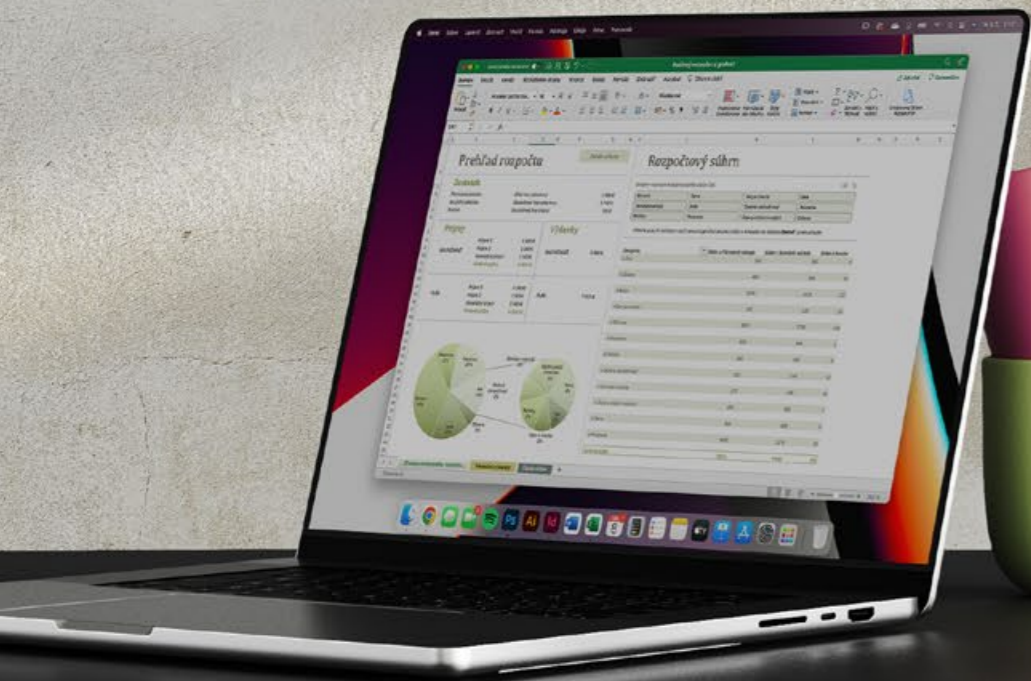

Ladies-friendly materials
Whether there is any dress code at the office or not, the fabrics used to upholster our chairs will not harm the finest stockings.

Trace Chair

Trace Chair S

Trace Meet

Let us introduce our tables

Created not only to hold
price offers but also
birthday presents.

Nimble Table

Trace SlimTable

Trace Table 69

Nimble Table Electric

Trace SlimTable Tall

Trace Table 138

solid

All tables are made of durable materials which can easily hold everything that belongs to focused work or important meeting.

elegant

They have rounded corners that perfectly go with the shape of our seating furniture. But you don't have to be afraid of experiments either. Thanks to the timeless design, they will also find their place in absolutely different combinations.

The most popular table among architects is 69 cm wide.

and electric

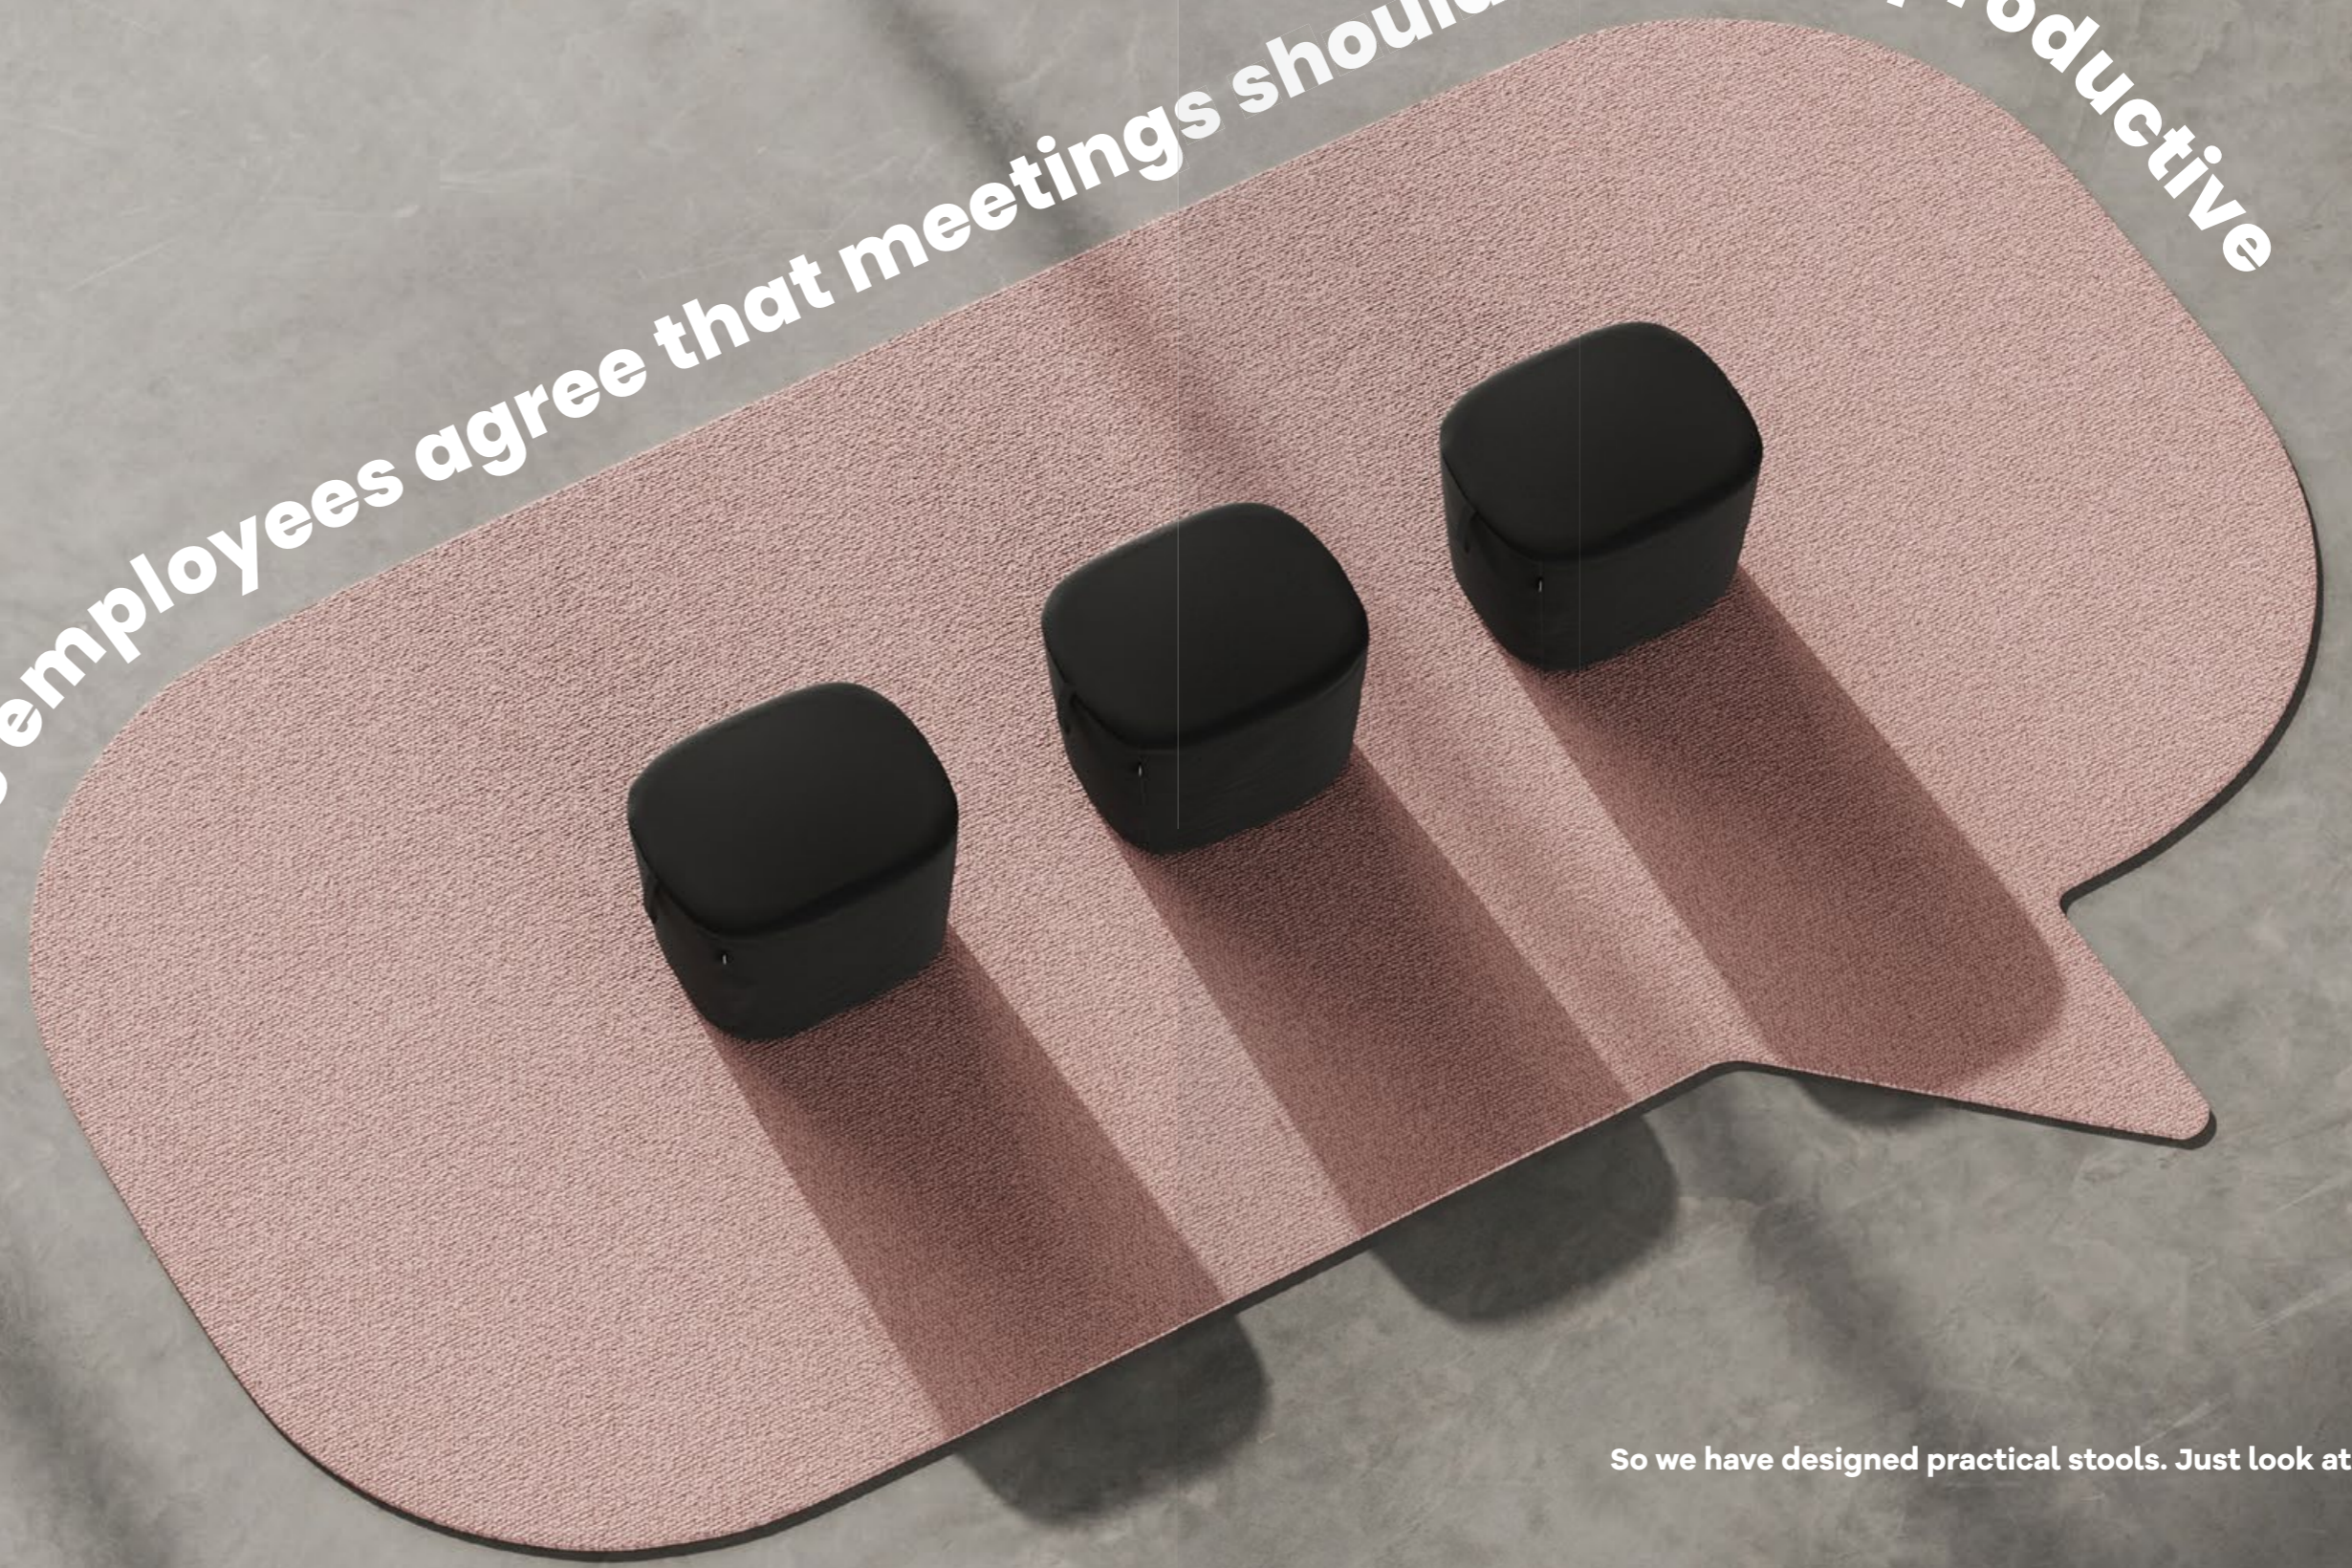

Any atmosphere in the office can now be powered by Nimble Electric.

Design / Michal Riabič

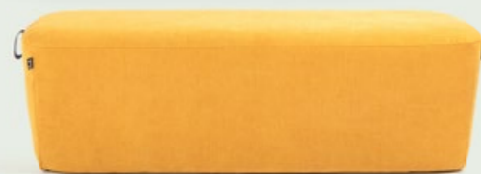

10 of 10 employees agree that meetings should be more productive

So we have designed practical stools. Just look at them.

perfect for
power meetings

No one can be productive 24 hours a day, 7 days a week. Research shows that our brain is able to concentrate for 25 minutes and then needs a short, 5-minute break.

This is why we have also included stools in our collection – they are ideal for short, efficient meetings.

What is more, stools allow you to easily seat more people and extend the standard capacity of the room.

Nimble StoolSmall

Nimble StoolMedium

Nimble BarStool

Nimble Bench

whatever the day brings,
take it easy

All stools provide individual team members sufficient seating stability. And when the workshop ends, they can just grip the loops and move them where they wish. Take them to the office and put their feet on them to relax after work.

Design / Michal Riabič

Triburet Low

Triburet Medium

Trace BarChair

Bring the vibe of home office to the office

Add comfy bean bags into the office and employees will almost feel at home.

Why almost? Unlike at home, they will not be bothered by any noisy neighbours there.

Easy Relax & Easy Otto

Here comes the best-selling and most popular bean bag. It is smaller, which makes it perfect for less generous spaces.

Thanks to the replaceable washable cover, it will also survive smaller accidents, such as pen writing or a coffee spill.

Design / Martin Guttman

Easy Kanoe

Having an opportunity to change a work desk and chair for a less formal and particularly softer seating can do wonders with the atmosphere at work.

For example, it can even reduce the stress level. Just sit down, forget about the deadlines for a while and work easy in our Kanoe. The high part serves as a comfortable head rest offering sufficient support during responding to e-mails even to taller employees.

Design / Michal Staško

Eat. Work. Sleep. Repeat.

Bean bags can really be used in many different ways.

Work

Nap

Games

Good

The more bean bags you place in the office, the more relaxed atmosphere you create

And what is the result of a relaxed atmosphere? Happy and satisfied employees who look forward to coming to work. Therefore, don't be afraid of using more different bean bags. The range of colours and materials you may choose from is wide and they will quickly become one of the most popular elements in the offices.

Design / Michal Staško

Better

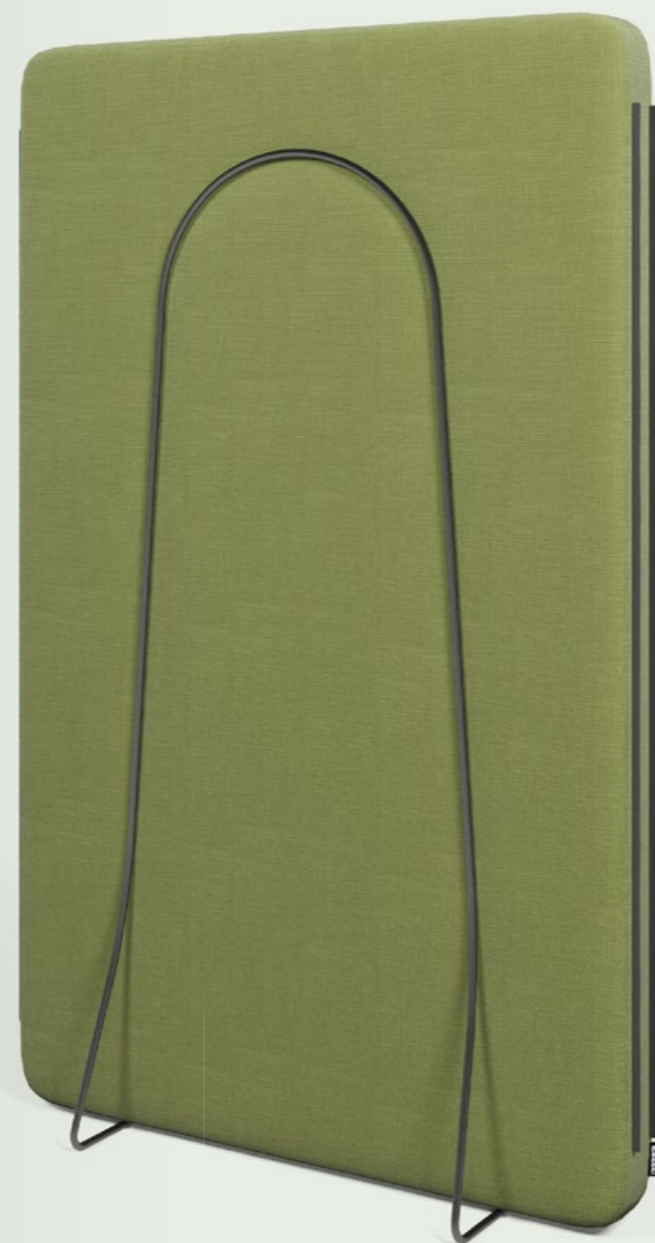

Perfect

Comfort level

Information behind this room divider is **CONFIDENTIAL**

But, because it's you, take a peep.

Trace Paravan Medium

What is said behind the divider, stays behind the divider

Having more privacy in an office full of people sometimes seems a mission impossible. Nevertheless, our designers have thought about every single detail. With dividers, you may divide any room and create a private spot for a conversation that should stay within four walls.

Trace Paravan High

Bye bye, noise

The divider consists of a soft panel with a core made of a sound absorbent material. The soft panel is inserted in a clip-shaped leg, making it very easy to move and adjust the panel. Combine multiple dividers and create an office within an office, so employees have room for focused work.

Dividers are available in two heights.

Design / Michal Riabič

Who wants to have their own office?

Easy Princ

Many dog keepers sometimes bring their pets to work, making them members of their work teams. And the dogs turn overnight into happiness managers on a mission to cheer up all the employees. But such a task requires a lot of energy and time. Therefore our portfolio also includes dog beds where dogs may concentrate on their important mission.

Design / Martin Guttman

Fabrics

Have you found your winner among our products?

Then it's time to choose the material. All fabrics are resistant to abrasion, and many of them passed the cigarette test for fire-resistance. They will even handle spilled coffee or water. Spilled liquid forms small droplets that can easily be removed from the fabric. This and many other features make them ideal materials for heavy-duty working environments. Just see for yourself!

Still, our furniture can also be upholstered with totally different fabrics of your choice.
